

ALL THINGS XRPL

Wallet Starter Kit

Everything we recommend a new XRP holder do in their first 60 minutes.

What's inside

1. Pick the right wallet for your situation
2. The 60-minute setup checklist
3. Five mistakes we see new XRP holders make
4. Where to learn more

Welcome to the XRP Ledger. This one-page kit summarises everything we recommend a new XRP holder do in their first 60 minutes.

1. Pick the right wallet for your situation

Goal	Our pick	Why
Just getting started, free	Xaman (XUMM)	Built by XRPL Labs, full DEX/AMM/NFT support
Cold storage of larger holdings	Ledger Nano X	Industry-standard secure element, multi-chain
Affordable hardware	Trezor Safe 3	Open-source firmware, secure element, \$79
Card-style hardware	Tangem	NFC tap-to-sign, \$54.90, no seed phrase to lose
Maximum security (air-gapped)	ELLIPAL Titan	No USB / Bluetooth / Wi-Fi — QR codes only
Browser-based dApp use	Crossmark	MetaMask-style UX for the XRPL on desktop

2. The 60-minute setup checklist

- 1 Buy your wallet from the official source. Never an Amazon reseller.
- 2 Set up the device offline first. Do not enter your seed phrase on any computer, ever.
- 3 Write your seed phrase / secret numbers on paper, then store the paper somewhere fire-safe and out of sight. Do not photograph it.
- 4 Create a small test transaction (1 XRP) and verify it arrives before moving any larger amount.
- 5 Bookmark only the official wallet URL. Phishing sites are the #1 way XRP holders lose funds.

3. Five mistakes we see new XRP holders make

- 1 Storing the seed phrase in cloud notes, email, or a password manager.

- 2 Sending XRP to an exchange without the destination tag.
- 3 Believing “Ripple” giveaway videos on YouTube. They are all scams.
- 4 Approving trustlines for unknown tokens — this can authorise spending.
- 5 Putting the entire portfolio in a single hot wallet on a phone they also use for general browsing.

4. Where to learn more

- Best XRP wallets, ranked — <https://allthingsxrpl.com/best-xrp-wallets>
- Best for beginners — <https://allthingsxrpl.com/best-for/beginners>
